gwml2:gwAquiferSystemPart
gwml2:gwAquiferSystem
wbd: containing HUC
wbd:contributingDrainageBasin
nhdplusv2:FlowLineCatchment
+ nhdplusv2:containsFlowLine (nhdplusv2:FlowLine)
+ nhdplusv2:hasCatchmentId (xsd:string)
:hasLevelPathId could also be a data property for :MainStem (?) [triplify the csv lookup table ?]
:partOfMainStem is a subproperty of :partOfFlowPath. Do we need both?
nhdplusv2:partOfMainStem
Should :containsFlowLine go the other direction, like :containingCatchment?
nhdplusv2:containsFlowLine
nhdplusv2:partOfWaterBody
